Using JHipster (https://www.jhipster.tech/), create a spring boot application that manages resident room assignments.

The application should contain at least three entities:
- Resident
- Room
- Facility

User Stories:
- As a facility administrator, I want to add Facilities to the system, so that I can view all the Facilities I'm responsible for.
- As a facility administrator, I want to add Rooms to a Facility so I can view all the Rooms contained in a Facility.
- As a facility administrator, I want to assign or remove a Resident to/from a Room so that I can view all the Resident Room assignments.

Requirements:
- Use the Angular-generated JHipster UI
- Use MySQL
- Run with Docker Compose
